ABOUT ME

Data Analyst / Analytic Engineer with 5+ years of experience designing, modeling, and visualizing data for business decision-making. Strong expertise in **SQL, Python, Power BI, and Snowflake**, with hands-on experience delivering scalable analytics solutions in enterprise environments. Proven ability to collaborate with cross-functional teams, translate business requirements into technical solutions, and optimize data models and reporting performance. Passionate about continuous learning and building high-quality, data-driven products.

WORK EXPERIENCE

Consultant II. Analytic Engineering at Hakkōda, an IBM Company (10/2024 – 01/2026), Heredia, Costa Rica

- Designed, optimized, and maintained Power BI semantic models and reports, improving query performance, refresh times, and overall usability for business stakeholders.
- Developed and supported Snowflake-based data warehouse solutions, including data modeling, ingestion pipelines, and transformation layers aligned with analytics best practices.
- Collaborated with cross-functional teams (data engineers, analysts, and business users) to gather requirements and deliver scalable, production-ready analytics solutions.
- Acted as a trusted analytics partner for stakeholders, enabling data-driven decision-making across multiple business domains.

Data Analyst at SGF Global (08/2022 – 08/2024), Heredia, Costa Rica

- Developed and maintained dashboards and reports using Power BI and Tableau.
- Designed SQL queries and scripts to extract, transform, and analyze data from relational databases.
- Built forms and automations using Power Apps and Power Automate to improve operational workflows.
- Performed statistical analysis using Python and Excel on survey and operational datasets.
- Supported analytics infrastructure and reporting for multiple business stakeholders.

Data Specialist at DHL (05/2021 – 04/2022), Heredia, Costa Rica

- Designed and implemented a centralized database infrastructure for the Americas Service Desk.
- Analyzed agent KPIs to support performance improvement and compensation models.
- Built dashboards and reports using Power BI and Python to communicate insights to stakeholders.
- Cleaned, transformed, and analyzed large datasets using SQL.
- Delivered actionable insights to improve service efficiency across the region.

Data Analyst at Intel Corporation (10/2019 – 04/2021), Heredia, Costa Rica

- Developed SQL queries and Python scripts to automate data collection and analysis.
- Conducted exploratory data analysis to identify trends and performance improvement opportunities.
- Built dashboards and reports using Power BI and Excel for leadership teams.
- Modeled and analyzed processor architecture data to support engineering decision-making.
- Presented analytical findings to management and technical stakeholders.

EDUCATION

Bachelor's Degree in Data Science, LEAD University (01/2020 – 12/2023), San José, Costa Rica

Technical Degree in Computer Networking, Colegio Técnico Profesional de Hatillo (02/2017 – 12/2019), San José, Costa Rica

TECHNICAL SKILLS

- **Data & Analytics:** SQL, Python, Power BI, Tableau, Snowflake
- **Data Engineering:** ETL / ELT, Data Modeling, Data Warehousing
- **Programming & Libraries:** Pandas, R, NumPy, Scikit-learn
- **Databases:** SQL Databases, NoSQL Databases
- **Cloud & Tools:** Microsoft Azure, Excel (Advanced), Power Apps, Power Automate
